

# LASIK

## What is LASIK?

LASIK, or laser-assisted in-situ keratomileusis, is a surgical procedure that improves your vision by permanently reshaping the cornea, thereby reducing or eliminating your need for glasses or contact lenses. LASIK is the most commonly performed type of refractive procedure and is an effective treatment for a wide range of vision problems, including nearsightedness, farsightedness, and astigmatism.

### Can I Afford LASIK?

For many patients, cost and affordability are a concern when considering LASIK. We work closely with each patient to find the best way to make your procedure affordable!

You have a wide variety of choices with Larson Eye Care! Ask our friendly staff about your CareCredit financing, Health Savings Accounts (HSA), or Flexible Spending Accounts (FSA) options.

Through our financing and payment options, you will be seeing clearer, sooner.
